PROFESSIONAL SUMMARY

MS in Business Analytics candidate with a concentration in Finance and 2.5 years of healthcare operations experience at Optum supporting UnitedHealthcare. Combines academic knowledge of financial analysis and capital markets with healthcare claims experience and analytics projects examining cost drivers, utilization trends, and performance metrics. Strong interest in pharmacy pricing, financial analytics, and data-driven strategy. Seeking to apply Excel, SQL, and reporting skills to support Supply Chain Leadership, MAC pricing analysis, performance guarantee monitoring, strategic pricing initiatives, and ad hoc financial analysis at Express Scripts. This role closely aligns with my enthusiasm for finance and my healthcare domain experience.

SKILLS

Analytics and reporting	Microsoft Excel, SQL, Power BI, Tableau, R programming, dashboard development
Data management	Data cleaning, data validation, anomaly identification, billing pattern analysis
Healthcare analysis	Claims cost metrics, utilization trends, denial rates, claims and appeals analysis
Business operations	Issue identification and resolution, operational analysis, workflow coordination, service-level agreements (SLAs), deadline management.

CERTIFICATIONS

MARKETS SALES & TRADING JOB SIMULATION | CITI VIA FORAGE | OCTOBER 2026

COMMERCIAL BANKING VIRTUAL EXPERIENCE | J.P. MORGAN VIA FORAGE | MAY 2022

EXPERIENCE

Optum Global Solutions | UnitedHealth Group **July 2022 – December 2024**

Associate – Healthcare Operations (Appeals & Grievances) | Client: UnitedHealthcare

- Analyzed and processed 40–60 healthcare claims and appeals daily, verifying case accuracy and adherence to applicable guidelines.
- Investigated claims disputes through data review and research, identifying case issues and supporting accurate resolution.
- Documented investigation findings, resolution steps, and escalation reasons to support consistent handling of claims, appeals, and grievances.
- Managed expedited cases under strict SLAs, prioritizing time-sensitive reviews and resolutions to meet tight deadlines.
- Prepared Excel reports summarizing claims trends, outstanding cases, and recurring issues to support operational analysis and management decisions.

PROJECTS

Superstore Profitability Analysis and Pricing Optimization

Business Analytics Capstone | Roosevelt University | 8-week team project

- Analyzed sales, profit, and discount patterns across regions, product categories, and customer segments to identify profitability drivers.

Healthcare Claims Analytics Dashboard | Power BI and Excel

- Analyzed 50,000+ claims records to identify healthcare cost drivers and utilization trends; developed dashboards tracking denial rates, processing time, and cost metrics.

Fraud Detection Analysis | SQL and R

- Analyzed billing patterns and provider trends to flag high-risk claims; cleaned and validated data to support anomaly identification and reliable analysis.

ADDITIONAL EXPERIENCE

Axis Bank | Fraud Operations Associate Intern | India **March – June 2022**

- Supported credit card transaction fraud investigations and flagged suspicious activity.

TBL Connect Pvt Ltd | Analytical Operations Associate Intern | India **September – October 2021**

- Supported operational processes and workflow coordination.
